

MBK型丝杆电机传动座

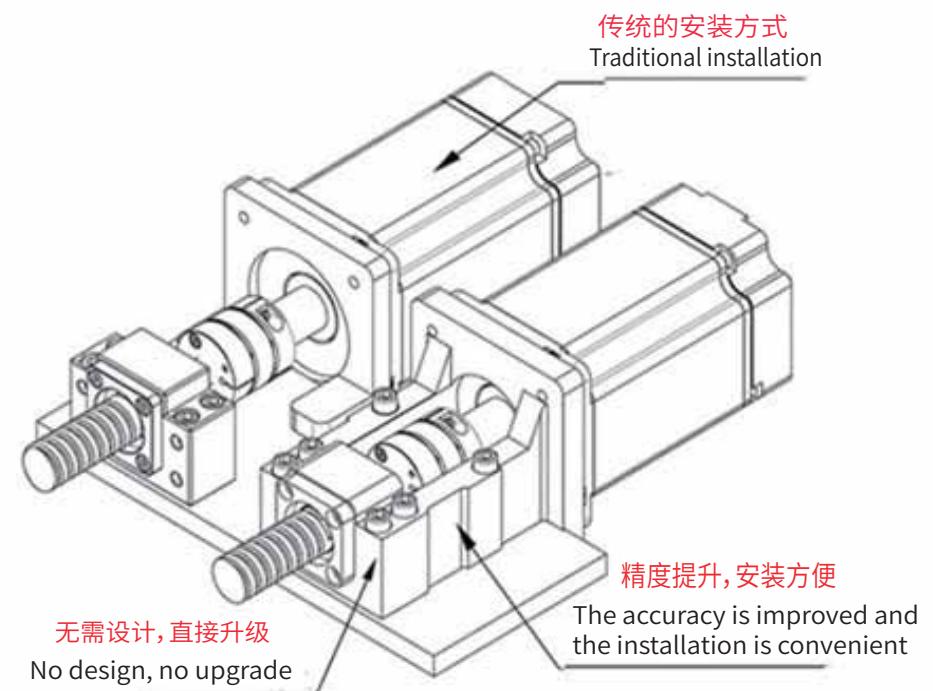

MBK screw motor drive base

E

直线电机座系列

Linear Motor Seat Series

直线电机座规格表

MBK10-57

MBK12-57

适配电机型号：57步进电机

MBK10-60

MBK12-60

适配电机型号：60-400W伺服电机

内含部件 Included parts	座体 Seat/base	轴承 Bearing	轴承压盖 Bearing gland	密封圈 Sealing ring	垫圈 Washer	锁紧螺母 Locking nut
内含数量： QTY:	1 Pc	1组 1set	1 1pc	2 2pcs	2 2pcs	1 1pc

特点/ Features

一体化马达座定位孔与轴承安装孔采取一体化加工，能最大限度保证马达轴心/联轴器轴心/轴承孔轴心/丝杆轴心等四位一体，从而克服了分离式马达座与分离式轴承座联合安装时不同轴的缺点！

轴承轴心与座体安装基面平度达到0.01/100，保证丝杆安装后的平行度。

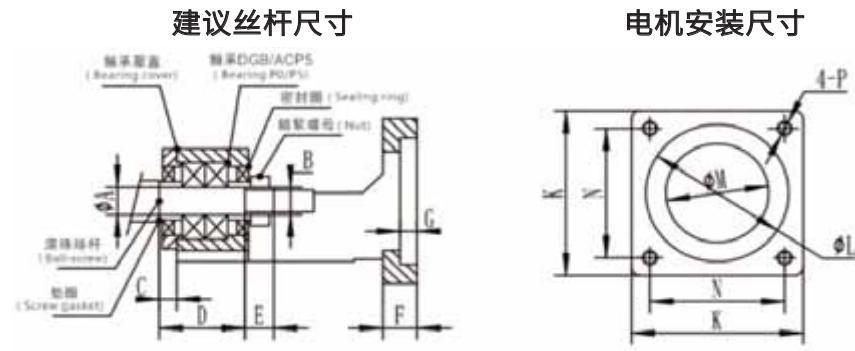

The positioning hole of the integrated motor seat and the bearing installation hole are processed in an integrated way, which can maximize the four position integration of the motor axis / coupling axis / bearing hole axis / screwrod axis, so as to overcome the shortcomings of different shafts when the separate motor seat and the separate bearing seat are installed together!

The parallelism between the bearing shaft and the mounting surface of the base shall reach 0.01/100 to ensure the parallelism of the screw after installation

备注:

1. 使用轴承经预压处理，轴向0间隙 (All types make preload)

2. 轴承采用P5配对组装，最适宜滚珠丝杆使用。

(Bearing P5 pairing assembled using the most appropriate ball screw)
